

## NMB-01: Train of Four Taken

NMB-01: Percentage of patients with a documented Train of Four (TOF) after last dose of non-depolarizing neuromuscular blocker and before extubation.

MPOG Concept ID	Neuromuscular Blocker Medication
10043	Atracurium
10129	Cisatracurium
10344	Pancuronium
10393	Rocuronium
10446	Vecuronium

<u>Measure Time Period:</u> <u>Anesthesia Start</u> to Earliest Extubation\*

Anesthesia start as determined by the <u>Anesthesia</u> <u>Start</u> phenotype.

\*Earliest Extubation as determined by the earliest value resulted before <u>Anesthesia End</u> from the <u>Extubation Times</u> and <u>LMA Removal Times</u> phenotypes.
