NMB-03: Percentage of pediatric patients ≤ 5 years old who receive appropriate initial dosing of non-depolarizing neuromuscular blocking drugs (NMB) intraoperatively.

**Measure Time Period:**
- Anesthesia Start to Earliest Extubation.
- Anesthesia start as determined by the Anesthesia Start Phenotype.
- Earliest Extubation as determined by the Extubation Times Phenotype.

**START:**
All patients

- Age > 5 years
  - Exclude

- ASA 6 including Organ Procurement
  - Exclude

- Documented weight?
  - Evaluate

- Was patient extubated before Anesthesia End?
  - Exclude

- NMB bolus medication administered?
  - Exclude

- Was first NMB dose within threshold? See reference table.
  - Evaluate
