TEMP-04-Peds: Percentage of pediatric patients <18 years old who have a median core/near core body temperature >36 °C (96.8 °F) during the procedure.

Algorithm for determining Measure Start/End Times

Measure Start Time:
- Patient In Room: If not then,
- Induction Start: If not then,
- Surgery Start: If not then,
- Anesthesia End: If not then,

Measure End Time:
- Patient Out of Room: If not then,
- Surgery End: If not then,
- Anesthesia End: If not then,
